EDUCATION

Bachelor of Technology In Computer Science and Engineering

2020 - 2024

Graphic Era Deemed to be University, Dehradun

CGPA: 8.1

EXPERIENCE

Associate Software Engineer

Aug 2024 - Present

Accenture

Remote

- Built an **AI-powered chatbot** to automate manual access provisioning, reducing administrative response time by 50–70% and minimizing errors in role assignments.
- Developed the solution using Python, leveraging Rasa for intent recognition, Moodle **REST APIs** for real-time permission updates, and **Hugging Face Transformers** for **advanced NLP** processing.

Fullstack Developer Intern

Apr 2024 - July 2024

Elphe

Remote

- Developed and maintained scalable web applications using JavaScript and TypeScript, implementing **responsive UI** components to improve **user experience**.
- Built and integrated RESTful APIs using Node.js on a **serverless architecture**, managing data with Firebase and Amazon Web Services.

PROJECTS

Trackit [\[link\]](#) - Python, Flask, SQLite, Jinja2, JavaScript, Chart.js, D3.js, GSAP, HTML5, CSS3

- Built Trackit, a full-stack personal finance web app with **user authentication**, expense tracking by category, savings rate calculation, monthly spending charts, and CSV export.
- Implemented secure multi-user architecture with Flask-Login session management, **Bcrypt password hashing**, and email-based password reset using **JWT-style** signed tokens.

VideoStream [\[link\]](#) - Node.js, MongoDB, React.js, PostgreSQL, Express, Redis, FFmpeg, JWT

- Built a full-stack video streaming platform with end-to-end upload, transcoding, and adaptive HLS playback supporting 480p/720p/1080p quality switching via hls.js and FFmpeg **multi-output pipelines**.
- Designed an async video processing architecture using BullMQ and Redis for job queuing with exponential backoff retries, decoupling upload handling from heavy **FFmpeg transcoding workloads**.

Distributed Real Estate Marketplace [\[link\]](#) - React.js, Ethers.js, Hardhat, Javascript, Solidity

- Built a Web 3.0 Real Estate NFT App for secure buying and selling of properties using React.js and Material UI on the front end and Solidity to write the **NFT Smart Contracts**.
- Ether.js is used to enable interaction between the front-end and smart contract. NFT Metadata is stored on Inter Planetary File System to provide **decentralization**.

SKILLS

Technical Skills

- **Languages:** Python, JavaScript, Typescript, C++, HTML, CSS
- **Database:** MongoDB, SQLite, PostgreSQL, Supabase
- **Technologies/Framework:** Flask, React, Node.js, NLP, REST APIs, Linux, Cloudrun, Docker, Git, NLP, Hugging Face, FFmpeg, JWT, NFT, Ethers.js
